

WE ARE PROFESSIONALS SERVING BUSINESS PROFESSIONALS

- Our team has experience in technical support, data protection and security, and business management.
- Our experts understand how technology fits into the management of a successful business.
- We are the people that technical gurus call when they need help resolving a problem.
- Tek Team Xtreme helps businesses reduce exposure to viruses/spyware, downtime, data loss, and information theft.
- We are your full-time technical support team on an as-needed basis.

HOW TO PROTECT YOUR BUSINESS AND WORK EVEN SMARTER

- Call us to assess your technology structure, eliminate sources of risk, and create a technical support & recovery plan.
- Call us to learn how to maximize your productivity and return on your technology investment.

Call us today – 408-425-2714.

Technology Risk Management & Productivity Solutions

"Our relationship with Tek Team Xtreme mirrors those we strive to have with our patients." -- Dr. William Francis, DDS

www.tekteamxtreme.com

DEPENDENCE ON TECHNOLOGY CAN PUT YOUR BUSINESS AT RISK

- Hidden vulnerabilities in your hardware or virus protection can create a false sense of security and costly downtime.
- A poorly configured or inadequate Internet firewall may result in data theft and liability to you.
- Inadequate backup methods (such as “tape-only”) may result in the loss of key data and customer confidence.
- Insufficient technology documentation and recovery plans are common sources of risk that often go unnoticed until it is too late.

DOES YOUR TECHNOLOGY MAXIMIZE PROFIT & PRODUCTIVITY?

- Many office networks get the job done but rarely provide the return on investment they should.
- Technologies that are easy for your “technical guru” may not be optimal for your business.
- Wrong technology choices may eventually limit your ability to collaborate with partners and colleagues.
- An improperly maintained technology plan can lower your profit and productivity.

HOW WE HELP YOU MANAGE RISKS AND INCREASE PRODUCTIVITY

- We find and eliminate hidden points of technical vulnerability that are sources of risk to your business.
- We document your network and technology structure, and provide a recovery plan in case of technology failure.
- We help you develop a technology plan to maximize your profit and productivity.
- We act as your advocate in working with technology product and service providers.
- We are there for you and your staff to handle technical questions and problems.
